

SmartWallet

SmartWallet is a secure single login system that enabled you to access to multiple web accounts with single master password. The master password is uniquely protected with our proprietary **BioSignIN Engine**. **BioSignIN Engine** is an additional authentication layer of security that strengthens traditional password-based authentication system with typing biometric technique.

Highlighted Features

Single Login System

- Able to remember all your account passwords and easily access to multiple web accounts with single master password (without changing your individual account's password)

Additional Layer of Authentication Security

- Besides username and password verification for access control, we able to verify your typing keystroke for your password by using our proprietary BioSignIN Engine.

Automatically Sign IN Function

- Single click on selected website profile from drop-down box to access directly to your designated web account

Double Protection with BioSignIN Prompt

- The BioSignIN Engine will prompt you again for username & password verification when user requires additional protection for the web profile (user option)

Encrypted Database Security

- Safely stores all your accounts details with encryption algorithm.
