

# Portable Data Security

---

Turn your keyboard into biometric sensor!

secured by

**EABIO**

# USB Flash Drive

- Portable data storage devices commonly use anywhere
- Typically small, lightweight, removable and rewritable.
- Projected sales of USB Flash Drive to grow to 150 million units worldwide by 2008

# Major Problems..

The little USB drive  
can easily lose,  
stolen, and etc...

Easily duplicate your  
USB drive data and  
information...

Worry about losing  
sensitive information  
such banking, and  
personal data??

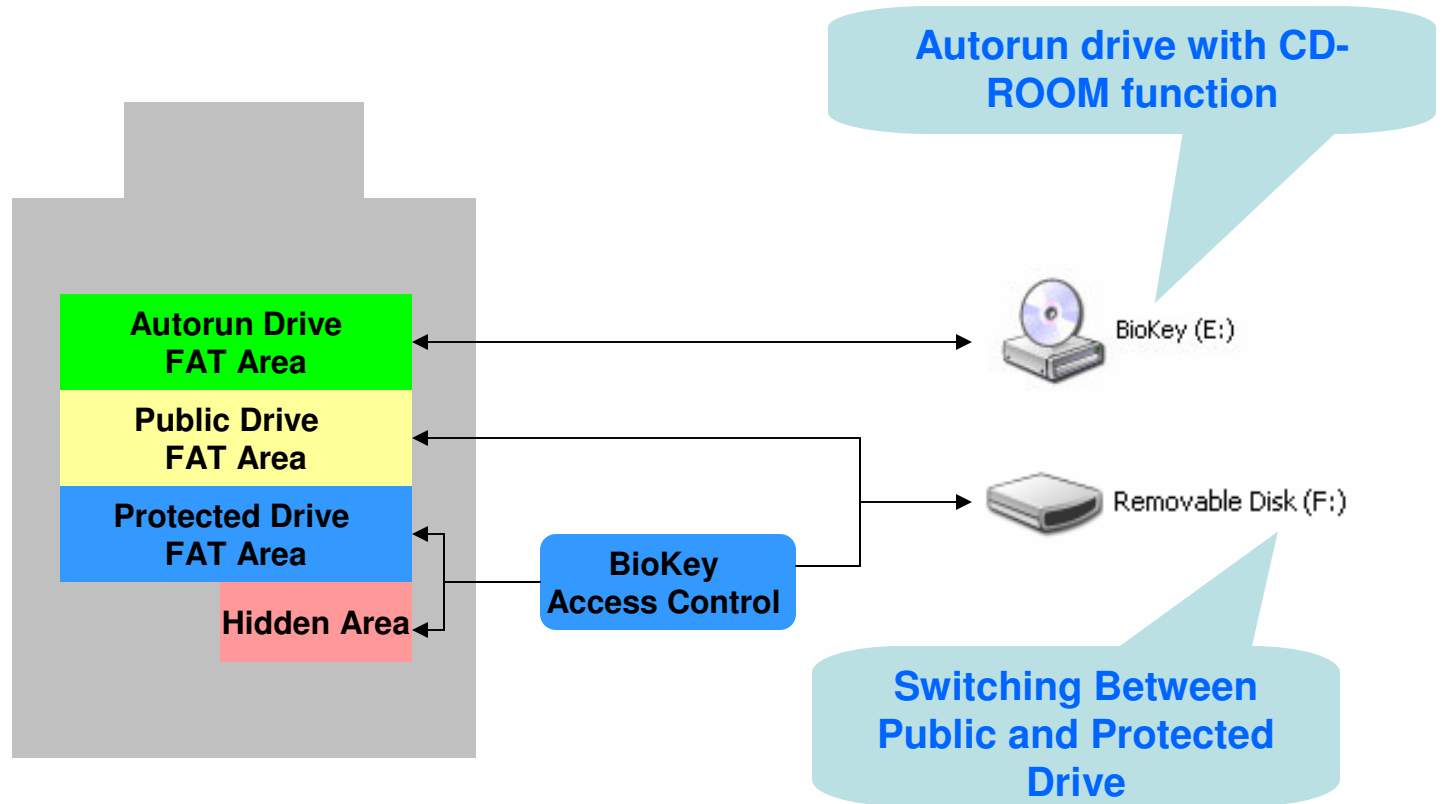

# BioKey

- Biokey able to protect your portable data from stolen!
- Biokey is password protected USB drive with Typing Biometric enhancement. (Two Factors Authentication methodology.
- Only with your password and keystroke able to access to your secure drive partition

# How BioKey Works?

# BioKey Demonstration

Thank You!
